

Turkish Journal of Endocrinology and Metabolism

JOURNAL OF THE SOCIETY OF ENDOCRINOLOGY AND METABOLISM OF TURKEY

EDITORIAL

In this issue of our journal, you will find interesting pediatric case reports and research articles by adult endocrinologists. These papers are being submitted from various regions of Turkey as well as from countries around the world. We hope to broaden our reach to readers and increase the numbers of scientists who send their work to the journal.

While everyone is getting ready for the upcoming annual congress of our society in October, 2008, I hope they will also consider sending their articles for publication in TJEM after the Congress.

Sincerely,

Prof.Dr. Sema Akalin
Editor in Chief
